EMPRESA CUIT

CUIT es una empresa familiar, dedicada a la fabricación y diseño de maquetas a escala de edificios emblemáticos y mosaicos decorativos.

Empresa fundada hace mas de 70 años, y una trayectoria familiar en el sector del juguete desde hace mas de 100.

Utilizamos desde los inicios, metodos tradicionales de fabricación de piezas de cerámica en diferentes escalas, empleando las mejores arcillas para que los productos sean de excelente nivel de calidad.

Entre nuestros productos, podrás encontrar maquetas que reproducen edificios y monumentos arquitectónicos de diferentes épocas y estilos. También fabricamos kits para construir mosaicos decorativos.

FACTORY CUIT

CUIT is a family business, dedicated to the manufacture and design of scale models of emblematic buildings and decorative mosaics.

Company founded more than 70 years ago, and with a family trajectory in the toy sector for more than 100 years.

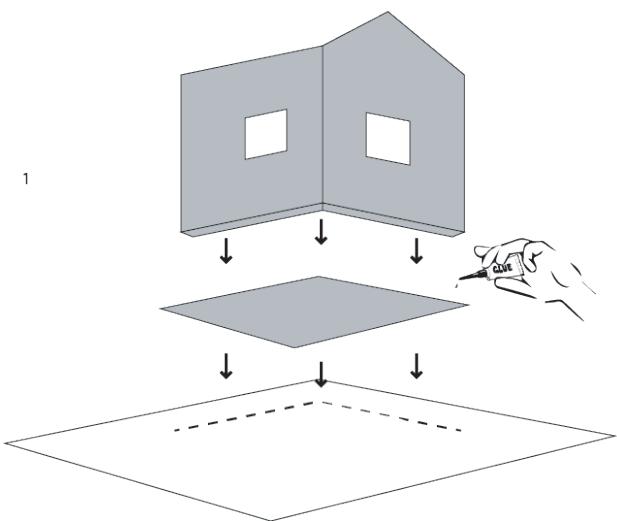

We used from the beginning, traditional methods of manufacturing ceramic pieces in different scales, using the best clays so that the products are of an excellent level of quality.

Among our products, you will find models that reproduce buildings and architectural monuments from different eras and styles. We also manufacture kits to build decorative mosaics.

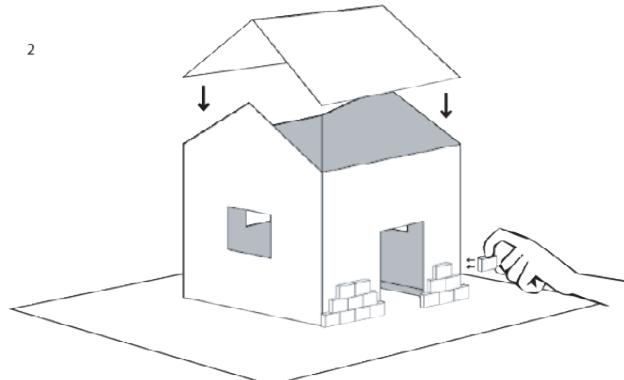

INSTRUCCIONES DE MONTAJE

ASSEMBLY INSTRUCTIONS

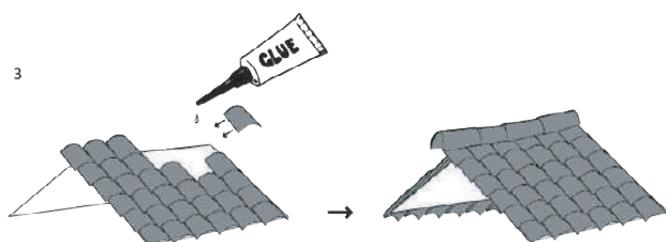

Montar la estructura de cartón y la unión a la base de la estructura.

Assemble the cardboard structure and the union to the base of the structure.

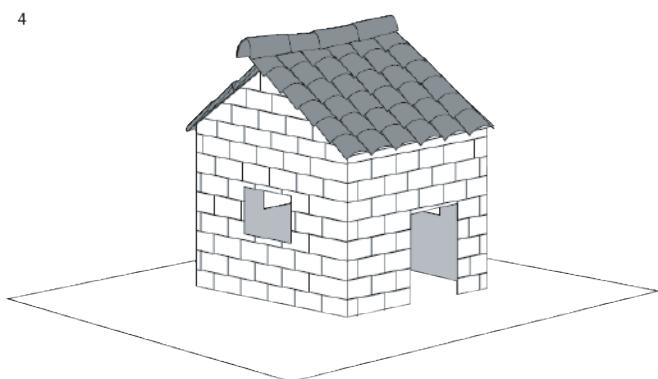

Una vez tengamos la estructura estable, comenzaremos a colocar las piezas externas a la arquitectura y las indicadas por las instrucciones de la misma.

Once we have the stable structure, we will begin to place the external parts to the architecture and those indicated by the instructions of the same.

Es conveniente comenzar en orden ascendente vertical, para que no haya ningún error de montaje.

It is convenient to start in vertical ascending order, so that there is no assembly error.

Unir las partes finales montadas con sus piezas correspondientes.

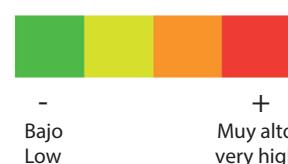

Join the final assembled parts with their corresponding parts.

Agregar la decoración exterior como vegetación, rocas, vallas, etc. Y... ¡Nuestra maqueta ya está lista!

Add exterior decoration such as vegetation, rocks, fences, etc. And... Our scale model is ready!

Arco del triunfo, de 51 metros de alto y 45 de ancho, está de pie en uno de los puntos más importantes de París, justo donde convergen doce avenidas.

La idea original de este monumento fue de Napoleón I en 1846.

51 metres high and 45 metres wide, the Arc stands in one of the most important sites of Paris at the convergence of 12 avenues.

The original plans were laid by Napoleon the 1st in 1846.

PIEZAS DE REPUESTO

CUIT ofrece una amplia gama de piezas de recambio (fieles reproducciones de la realidad, en distintas escalas y colores) fabricadas con arcillas naturales. Con ellas podrán ampliar los kits, o incluso llevar a cabo diseños propios

SPARE PARTS

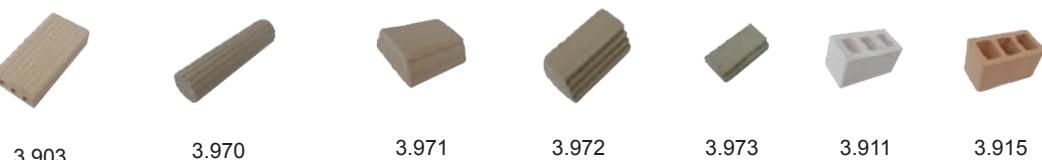

CUIT offers a wide range of spare parts (faithful reproductions of reality, in different scales and colors) made with natural clays and packed in two formats. With them you can expand the kits, or even carry out your own designs.

PIEDRAS 6X6 mm.

PIEDRAS 4x6 mm.

PRESENTACIÓN DE PRODUCTO

PRODUCT PRESENTATION

Nuestros kits incluyen todos los materiales necesarios para montar la maqueta.

- Piezas cerámicas, de diferentes formas y tamaños.
- Cola, como adhesivo
- Estructura base del edificio, material de cartón y con trazos intuitivos.

Beneficios Cognitivos (AIJU)

El producto Cuit esta abalado por AIJU (Instituto tecnológico del juguete), como producto didáctico para el desarrollo de capacidades cognitivas, como concentración, atención o velocidad mental,

También tiene resultados muy positivos con personas de movilidad reducida en las manos, como artritis.

Cada una de las maquetas tiene señalizado su nivel de dificultad, habiéndolas evaluado del 1 al 5 de menor a mayor dificultad.

Cognitive Benefits (AIJU)

The Cuit product is promoted by AIJU (Technological Toy Institute), as a didactic product for the development of cognitive abilities, such as concentration, attention or mental speed,

It also has very positive results with people with reduced mobility in their hands, such as arthritis.

Each one of the models has its level of difficulty marked, having evaluated them from 1 to 5 from least to greatest difficulty.
